

# Global Impact of NFPA Standards

Pro Board Educational Conference 2020

Donald P. Bliss

January 23-25, 2020

## Today's discussion:

- The global fire problem
- Impact on the fire service
- Standards and accreditation as a solution
- Trends, challenges and barriers to success

# The Global Fire Problem

- ▶ 300,000 fire deaths annually
- ▶ Fourth largest cause of accidental injury
- ▶ 95% of fire deaths are in low- and middle-income countries
- ▶ Burn injury risk highest in low-income and informal settlements
- ▶ World Bank describes fires as “small, chronic disasters”

# Urbanization

Cities around the world are growing rapidly.

**1.4 MILLION**  
*people/week*

Up to 1.4 million people per week  
are moving into urban areas  
around the globe.

**1 BILLION**  
*new dwellings*

To support these growing populations,  
nearly 1 billion new dwelling units  
will be built by 2050.

# Water resources

# Impact on the Fire Service

- Resource demands
- Incident management
- Training & professional development
- Proactive intervention:
  - Community risk reduction
  - Community resilience
  - Economic development
  - Prevention & mitigation strategies

# Why NFPA Standards?

- Regularly updated
- Open, balanced, transparent process
- Focus is on safety
- Can be adopted, enforced & amended locally

# Why do standards change?

- Catastrophic event
- New technology
- Research identifies a new problem or solution
- Society changes the acceptable level of risk

**Recognition**

**Acceptance**

✓ **Use**

✓ **Code  
Adoption**

# Global use of NFPA standards

- Adopted or accepted in 70+ countries
- Translated into at least 15 languages
- Best practice for global industries
- Fire service trending towards NFPA standards

# Global challenges for NFPA standards

- Perception that standards are US-centric
- Translation
- Training
- Global participation in development process
- More research needed
- Increased speed of technological innovation

# Barriers to accreditation

- Cost of implementation
- Lack of understanding of accreditation
- Local/regional conditions not addressed in the standards
- Need for recognition of prior training/certification
- Competition from other standards bodies
- Language

# Global fire service challenges

- Climate change
- Natural and man-made disasters/cascading events
- War/civil disorder/terrorism/government collapse
- Urbanization
- Firefighting health risks
- Unsafe construction
- Robotics
- Rapid technology changes
- Dependence on IoT

# Questions?
